An Integrated Product Management Solution for Your Entire Portfolio

Posted on Oct 31, 2012, Posted by [Catherine Constantinides](#) Category [Product Management](#)

FeaturePlan is a central knowledge base and decision making tool that stores all your product information, from new customer ideas and customer enhancement requests, to market and technical requirements. It allows you to identify market problems and define the features and roadmaps to best respond to your customers needs through the products you develop.
